Mency is abundant and stock-houses make up their accounts readily at 5:36 per cent, and loans are made in special cases at 4 per cent. In commercial paper no material change. Best names pass at 5; per cent, and good at 6204 per cent. The payment of the one-rear certifi-M is absorbed insures a cheap money market. The next step by the Treasury will be the payment of the temporary loan, a process which will set free a further large amount of currency. All the present movements of the Treasury are toward an expansion of currency, which can have but one result, the stimulation of new speculative enterprises, and new speculations in existing stocks. The latter result is already seen in the prices at the Stock Exchange, and in the absence of a funding loan prices are are to touch points such as were paid when the paper money was in course of production. None of the currency manufactured to suppress the gigantic Rebellion bas been put out of sight, but remains to foster speculation in all directions. The business of the Autumn of 1866 promises to be of great magnitude, the crops everywhere being ample. This legitimate business will employ a good deal of money, but there will be no want of accommodation not proceeded with, of which the hope grows daily less.

the recent falling wheat, The Chicago Tribune of July 12

the recent failing warrat, I accounts the wheal market in this city has experienced a most extraordinary decline of 22-27 cents per bushel. On Tuesday No. I regular Syring Wheat was soid at 3 tow \$1.90, and vesterday it felt as low as \$1.60-claiming call and nominally at \$1.65. This decline in prices is the result whelly of excessive speculation. A prominent operator sems time since purchased the entire stock of wheat, and 20,000 or 300,000 bushels beside for fature delivery. In order completely to corner the sellers be adopted the somewhat movel expedient of selling cargos 'free on board to shippers at 102-13 cents below the market price, for lots to store. In this way sellers were forced to settle at the buyer's own price. This being accomplished, he threw the balance of the wheat upon the market and broke itdown."
